

Different Types of Diabetes

Understanding the four main types of diabetes is key to effective management.

Key Types of Diabetes

- **Type 1 Diabetes:** An autoimmune disorder that destroys insulin-producing cells in the pancreas.
- **Type 2 Diabetes:** Characterized by insulin resistance, where the body doesn't use insulin efficiently.
- **Gestational Diabetes:** Develops during pregnancy and typically resolves after childbirth.
- **Prediabetes:** A precursor to Type 2 diabetes, where blood sugar levels are higher than normal but not yet diabetic.

Empowering You to Manage Diabetes

Living with diabetes requires careful management and support. At Advanced Diabetes Supply (ADS) and US MED, we're dedicated to providing you with the tools and resources to live a fulfilling life. Our team of experts can help you select the right diabetes supplies, including insulin pumps, CGM systems, and more.

Let us help you take control of your diabetes management.

We're committed to your health. Contact us today for more information.
